### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Tyus on 8/14/06.

The application has been amended as follows:

Claim 8 has been canceled.

The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or render obvious record a process as called for in claims 1 and 17 in which 2 different catalysts are arranged in a sequence as called for in the claim. Further, as shown in examples, this sequence of the two catalysts yields unexpected results when compared with process using single each of them. In table 1 and 2, one having ordinary skill in the art would easily recognize that a process of using a sequence of catalysts as called for in the claim yields a lower amount of heavies and an ethylene conversion decline. As a result of using this sequence of the two catalysts, the cost of purification of the product is reduced and the life of the catalyst is longer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
